LEFTHAND TRIVIA

- Q: What makes humans the only primates who are predominantly right-handed?

A: Experts think it has to do with the development of the brain's left hemisphere, the language side.

- If you are right-handed, odds are you have 5 percent more bone mass in your right arm.
- If the head and hand detailers have it right, natural blondes are twice as likely to be left-handed as brunettes or redheads.
